

Place instep against the dotted line

Find the right fit for your child's feet.

Just follow these 4 steps:

1. When printing, make sure your printer is set to A4 and print at 100%.
2. Simply line up your child's heel on the dotted lines. Gently press on your child's feet to make sure they're flat and that the toes aren't curled. Tip: Try tickling the bottoms of their feet to get them relaxed and easy to measure.
3. Draw a line in front of their longest toe. Don't worry, it's common to have one foot longer than the other, so be sure to use the longer foot to measure.
4. Add an extra 0.5 cm for comfort and growth. Oh, and, remember to round up if your child's size falls in between.
